

# CROWN

## British Style Overdrive

The Crown British style overdrive was designed to mimic a variety of British School amps. From Plexi® and AC® to rich and full detailed JCM® overdrive tones. Ideal for boosting an amp to get that desirable crunch tone at lower volume, or giving that British character to any amplifier.

The Crown features jfet technology combining three calibrated stages in cascade mode, which results in very smooth tone with a tube like character, touch sensitive and natural- musical compression at high gain settings.

It's simple yet effective controls along with it's pedal friendly size will make your life easier. Use it's three controls (Drive, Color & Level) and two toggle switches (fat & hot) to experience the pedal's versatile and perfectly match any guitar or amp.

With the Color control you can choose between a wide range of British style amps. Combine it with different Drive settings and find your own sweet spot! Once you've done that, add low end using the Fat switch or punch and bite using the Hot switch.

### **Controls:**

- VOL: Adjusts the volume of the pedal
- DRIVE: Adjusts the amount of gain
- COLOR: Adjusts the tone of pedal selecting amp style at the same time
- FAT switch: Adds low end and body to the sound
- HOT switch: Hot mod, providing punch and bite.

### **Specs:**

- Handmade in Athens, Greece
- True Bypass
- Big range of British style sounds
- 1 Heavy Duty Foot-switch for enable / disable the pedal
- Internal 9V battery clip
- Power supply: regulated 9-12V DC (center -)
- Max power consumption: 2,1mA @ 9V DC
- Heavy duty & light weight aluminum box
- Dimensions: 112mm(Width) x 60mm(Depth) x 31mm(Height)
