

Nerve MKII is a high Gain-Distortion pedal, made especially for aggressive styles. Perfect matched jfet stages, gives an unbelievable result, touching the color both of the British & American style high gain amps. Quick response and touch sensitive, makes this pedal unique for extreme styles, and also ideal for almost any use.

It has 2 channels, channel **1 (Green)** & channel **2 (Red)** sharing a 4 controls standard equalizer. These 2 channels can be selected by the left sided foot-switch. Channel 1 has a dedicated switch for GAIN1 control to select between High and Low Gain settings. Channel 2 has a dedicated fx loop TRS jack (ins) for external pedals connection (Tip=send, Ring= return, Sleeve=ground).

Controls:

- VOL1: Adjusts the volume of the 1st channel
- VOL2: Adjusts the volume of the 2nd channel
- GAIN1: Adjusts the amount of gain for the 1st channel
- GAIN2: Adjusts the amount of gain for the 2nd channel
- HI: Adjusts the high frequencies for both channels
- LOW: Adjusts the low frequencies for both channels
- MID: Adjusts the middle frequencies for both channels
- PRES: Presence control for both channels
- H-L switch: A dedicated switch for GAIN1. Select between High and Low gain settings
